Séance au planétarium in English :

Cosmic extremes :

a journey from stars to black holes.

From the largest stars to the most powerful black holes, this session takes you on a journey through the universe's most extreme objects.

Discover colossal stars like Stephenson 2-18, explore the bizarre density of neutron stars, and uncover the mysteries of black holes from stellar remnants to supermassive giants.

Finally, witness the awe-inspiring energy of quasars, black holes so powerful they can reshape entire galaxies.

A visual exploration of the forces that shape our cosmos.

Ages 10 and up.
